# Binod Khatri

Personable and passionate WebDeveloper.

## PROJECTS

### Weather App

After taking a course in ReactJS for few weeks , i tried to implement my knowledge so far that i had learned and that's how this project was made. It is a web based application that gives you weather forecast for 5days if you use location based and for manual search it will give you current Weather forecast.

### Document Management System

This was my final year project which is developed by two member. and my role in the project was to design the frontend as well as backend. Technology used for FrontEnd is Reactjs and backend as service used as Firebase. Document management is a Webbased application that can be used to capture, track and store electronic documents such as PDFs, word processing files and digital images of paper-based content. It provides an interface for admin to manage the user as well as document where admin can create user/upload documents and view it.it also provide user dashboard where user can upload and view document easily.
